THÉOPHILE BOUZET

Engineering student in electronics, electrical energy and automatic control (3EA)

theophile.bouzet@gmail.com · +33 6 45 51 94 81 · Toulouse, France

PROFILE

First-year engineering student at ENSEEIHT (3EA track), I enjoy designing, programming and testing functional systems, from embedded code to a complete robot. I am looking for an internship or a work-study placement in aeronautics and aerospace.

PROJECTS AND ACTIVITIES

7Robot robotics club, ENSEEIHT

- Took part in the Coupe de France de Robotique (French Robotics Cup).
- Designed an R2-D2 robot and miniature cars for a racing event.
- Built skills in mechanical design (SolidWorks) and RP2040 microcontroller programming.

Hackathons, ENSEEIHT

- Delivered team projects under tight time constraints.

WORK EXPERIENCE

Activity Leader, Bloomdayz | summer 2026

- Supervised around 30 children alongside two other leaders for one week.
- Organized and supervised daily activities.

Private math tutor, Gens de Confiance | Since September 2026

- Created personalized lessons for two high-school students
- Prepared students for the Baccalauréat (French high-school diploma)

EDUCATION

ENSEEIHT (Toulouse INP) | 2026-2029

Engineering degree

- 3EA track (electronics, electrical energy, automatic control)

Preparatory classes PCSI then PC | 2024–2026

Lycée Pierre-de-Fermat, Toulouse

- Intensive undergraduate program in mathematics and physics

French Baccalauréat | 2024

Mathematics and physics-chemistry specializations

- Highest honors (Très Bien)

SKILLS

Programming: Python / C

Design and hardware: SolidWorks / Matlab / RP2040 microcontroller

LANGUAGES

- French (native)
- English (C1)
- Spanish (B1)
